

Becoming a Creation-Care Congregation

A Self-Organizing Kit Guidelines and Resources

**Lutherans Restoring Creation is a grassroots movement promoting care for creation
in the Evangelical Lutheran Church in America.**

***This is accomplished by cultivating a community of dedicated stewards of earth and neighbor who
proclaim God's promise of hope and healing for all.***

Why Lutherans Care for All Creation

- 1. Theology:** We affirm God as creator of all. We have an incarnation theology that cherishes the continuing presence of God in, with, and under all reality. We see redemption as the restoration of creation, as “new creation.” We see the future straining toward the fulfillment of creation.
- 2. Cross and Resurrection:** The gospel leads us to see God in solidarity with the human situation in all its pain and agony, especially the most vulnerable—humans and non-humans. A theology of the cross gives us solidarity with “creation groaning in travail” and stresses that God redeems all creation. Our affirmation of resurrection offers hope for new life in this world.
- 3. Worship and Sacraments:** We affirm that the material is a vehicle of the divine and that Christ is present in such ordinary elements of life as grapes and grain—the basis for our delight in and reverence for creation. Our worship invites us into transforming encounters with God deep in the flesh and in the world. We are called to worship God with creation.
- 4. Ecclesiology:** Our human vocation is “to serve and to preserve” Earth. We believe that the church exists for the sake of the world. We do not have an escapist theology. We are called to continual reformation in response to the needs and crises of this life. When Luther was asked what he would do if the world would end tomorrow, he apparently replied, “Plant a tree.”
- 5. Ethics:** We have an ethic of faith-active-in-love for neighbor and for all creation. Liberated from a legalism that enslaves, we are freed to address new situations, such as the ecological state of the world. We do so not to dominate but as servants to our human and non-human neighbors. We do so not out of fear or guilt or arrogance but joyfully out of grace, love, and gratitude.
- 6. Social Ministry:** With a heritage back to the Reformation, Lutherans have a history of social service to the poor, the elderly, the sick, the oppressed, the marginalized—through hospitals, homes for the elderly, social ministry agencies, Lutheran Immigration Service, and Lutheran World Relief. We extend that service to healing Earth community.
- 7. Advocacy:** We ELCA Lutherans have relevant social statements: “Caring for Creation” and “Sustainable Livelihood for All.” We have a staff person in environmental/hunger advocacy in Washington and Lutheran Public Policy offices in many states.
- 8. Scholarship and Education:** Many Lutheran scholars have written and spoken on ecology—in theology, ethics, biblical study, and social commentary. Colleges and seminaries of the ELCA have environmental ministry courses that prepare Lutherans for leadership in church and world. Many continuing education events for clergy and laity highlight creation care.
- 9. Caring for Creation across the church:** Several synods with creation-care committees have declared themselves to be Care-For-Creation Synods. Many Lutheran congregations incorporate Earth-care commitment in their life and mission—worship, education, building and grounds, discipleship at home and work, and public ministry. Lutheran camps have brought environmental concerns to many people. The ELCA headquarters has a Green Team that works to model environmental action. The ELCA offers grants for environmental projects.
- 10. Organizations for Earthkeeping:** Lutheran grassroots organizations, such as Lutherans Restoring Creation, have provided programs and training opportunities for all quarters of the church and have made available extensive resources for creation-care worship throughout the year at letallcreationpraise.org. In addition, many Lutheran congregations participate in interdenominational organizations such as Interfaith Power and Light, Earth Ministry, GreenFaith, EcoFaith Recovery, and Faith in Place.

Becoming a Creation Care Congregation Nature and Process of the Program: An Overview

The purpose of this kit is to enable you to have a basic program and organization to function as a creation-care congregation as well as have access to the resources needed to carry out this program on an ongoing basis. Whether or not you are already active in greening your congregation, this kit will enable you to identify yourself with Lutherans Restoring Creation, provide an overall plan for your efforts, and help you further your congregational commitment to ecology and justice. This is not a certification program. No one will tell you what to do or require you to submit a report. Nothing is expected for you to do aside from what you choose to do in carrying out your commitments to the program. There is no cost for this program apart from what you decide to spend on your mission to care for creation.

Stated positively, this is a program of identification with the goals and mission of Lutherans Restoring Creation. It is a commitment program. That is, we are inviting you to embrace a mission statement for your congregation and then proceed to carry it out as you are able. You will be responsible to yourself and to Earth community for what you do and how you do it.

This is a program for any and every congregation—large or small, urban or rural, old or young, wealthy or poor, of any ethnic identification. For each congregation, there are multiple ways for you to carry out a commitment to God’s creation. Maybe you have already done a great many projects that are Earth-friendly as part of your commitment to care for Earth. Then this program will count and celebrate everything you have already done, provide some structure to your efforts, and enable you to act in solidarity with other Lutheran congregations.

The steps are simple!

- 1. Approval of a Covenant with Creation.** The pastor(s) and church council approve the covenant on behalf of the congregation, expressing your creation-care commitment in the following five areas: worship, education, building and grounds, personal discipleship, public witness. You can make the commitments public in a brief ritual within a worship service.
- 2. A Liaison +/or Green Team and the Action Plan.** As part of this process, the pastor and church council authorize the establishment of an individual liaison or “green team” to record, carry out and report the commitments through the action plan. The church council or another committee may serve to carry out the creation care commitments.
- 3. Promote your identity.** Send LRC a copy/photo/scan of this signed covenant and be sure to display the signed covenant for all your members to see. Within a few weeks your congregation will be added to [LRC’s web listing of Caring for Creation Ministries](#) across the nation (you are in great company!). Promote this identity among the members and request to be put on the agenda at upcoming meetings of other active groups to brainstorm their involvement and ways to work together towards these goals.
- 4. Report and renew.** We encourage the green team to report their projects and events to the church council/congregation and to redo the action plan process at least on an annual basis. Share any efforts, events, collaborations, etc. with the LRC so others can be inspired and you can share what you learn. Write to us via email, call and leave a message or complete the online [Good Green News Update form online](#).

Getting Started

The program can begin with anyone so inspired—a pastor, interested lay people, a standing committee, the church council, etc. Once there is some interest, take the program to the church council for discussion, approval, and implementation on behalf of the congregation. If desired, have the congregation approve the plan at a duly constituted congregational meeting.

Lutherans Restoring Creation stands ready to assist you in providing this program, in making resources available for its implementation, and for promoting your story online as you choose to share it with us.

The “Green Team:”

- 1. Formation.** A green team may come into existence in a variety of ways: a self-designated group that approaches the pastor and the church council for authorization, appointed by the pastor and the church council, or recruited in response to an educational program on Earth care or a care for creation worship service.
- 2. Maintain Momentum.** Maintain the green team through regular meetings, representation from various committees, invitations to current and new members.
- 3. Choose a name!** Green Team, Creation Care Task Force, Earth-Care Committee, Stewards for Conservation; choose a name that acts as a welcoming banner to all. Discuss what words in your community have politicized connotations and try to veer away from those that may alienate anyone in your congregation.
- 4. Leaven for the Entire Congregation.** The use of “Team” is our term for the group that sees that the commitments to care for creation are carried out, because a “team” functions differently from other committees. The team may take the leadership on some projects, but mainly it does not serve like other committees. It is like leaven in the congregation to see that the various other groups fulfill the actions (see Action Plan below).
- 5. Alternatives.** We recommend that a distinct group, such as a Green Team, has the responsibility to give leadership in carrying out the Earth care commitments. However, there need not be a separate group. The functions of the Green Team can be carried out by a standing committee such as the social ministry committee or the stewardship committee or by the church council representatives from the various committees, as long as the arrangement is working well to carry out the commitments of the mission statement.

Accepting the program and Approving the Covenant

1. The purpose of accepting the program and approving the mission statement is to engage the entire congregation through its leadership to be aware of our Christian vocation to care for creation and to participate in this mission of the congregation. The benefit of pursuing efforts in five areas serves to make the mission comprehensive and to generate an identity of Earth-care as integral to the congregation. The program gives structure to your efforts in Earth-care and makes them intentional and public.
2. Initiating the process to make the church council aware of the proposal to accept the care for creation mission for your congregation is essential. In turn, the council may want to make the statement known to the whole congregation through a newsletter and/or bulletin insert. Invite input about the program and the covenant's affirmations.
3. When you distribute the Covenant, make it clear that this is part of a program to be a care-for-creation congregation identified with Lutherans Restoring Creation. Make it clear that this is not a certification program and does not commit the congregation to any particular actions, projects, or expenses apart from what the congregation itself chooses to do. Use the statement "Why Lutherans Care for Creation" to establish the reasons for the program.
4. We encourage the clergy and church council to read the statement carefully and to edit or adapt it to your situation and congregational ethos. In a formal procedure, the council will approve the affirmation, identify/authorize the liaison/green team, and establish any protocols for responsibility and reporting. You may want to have the covenant approved in a plenary meeting by the whole congregation.
5. You may want to consider incorporating into the overall mission statement of your congregation a phrase or sentence reflecting your commitment as a creation-care congregation.
6. Announce the approval of the program and the mission statement through the newsletter, bulletins, and personal witness at congregational gatherings. Urge people to participate in and support the effort. Consider using the brief ritual in this kit that can be part of any worship service as a way of integrating the program into the life of the congregation and acknowledging the sacred nature of our common vocation of Earth-Care.
8. Consider renewing the commitment to be a congregation that cares for creation on an annual basis, such as at an Earth Sunday service in April or perhaps at a service in the fall when you also ask members to make their personal stewardship commitment: (See "Covenant with Creation" and ritual in this kit).
9. You may want to let the larger community in which your church is located know about your Earth-care commitment via a local newspaper or through your synodical media outlets.

Congregational Care-for-Creation Covenant

As a congregation committed to care for creation, we affirm God's creation in all its glory and beauty. We acknowledge God as the source of all things. We acknowledge Christ as the redeemer of all things. We acknowledge the Spirit as the sustainer of all things. As a result, we strive to respect all of life as sacred. We accept our vocation as Earth-keepers who care for creation. We accept our responsibility to live justly in relation to our fellow human beings in ways that all creatures may mutually thrive together.

Worship: We seek to worship throughout the year so that we express our gratitude and praise to God as creator, redeemer, and sustainer. We are committed to glorify God intentionally together with all creation. In worship, we will celebrate creation, confess our sins against creation, grieve the losses of creation, and commit ourselves to care for Earth.

Education: We seek to learn about the biblical, theological, and ecclesial traditions concerning creation, including the biblical mandate from God for us to care for Earth. We also seek to learn about the present degradations of creation due to human activity, how these degradations are related to human exploitation and oppression, how we as religious people are implicated in these matters, and what we as Christians can do to heal and restore creation for future generations.

Building and Grounds: We agree to assess the impact that our activities and the use and maintenance of our property may have upon creation—in such matters as energy and water use, cleaning products, lawn care, paper use, food choices, recycling and waste, and transportation. We will strive to make choices that lessen our negative impact on Earth and that serve to renew and restore Earth community.

Discipleship as Home and Work: We encourage ourselves as individual members of this congregation—at whatever age, economic level, ethnic group, or walk of life—to care for creation in our personal lifestyle, in our homes, and at our work—knowing that our habits and practices can contribute significantly to care for creation. We seek to foster a closer relationship with nature so that we can live simply and walk lightly upon Earth.

Public Ministry: We seek to change the systems that foster the degradation of creation and to rectify the injustices that result from it. And we seek to alert our members to environmental legislation that protects creation and to encourage their active participation in the development of public policy. We encourage members to engage in civic activities that foster ecological health.

Because we desire to leave Earth a better place for our children, we will promote love and respect for creation among our youth, teach them responsible Earth practices, and engage them in projects that restore creation. We will pursue this mission in a grace-filled manner, seeking to find hope and joy in the commitments and sacrifices these provisions may entail and in the restorations they engender. We seek to let our care for creation be known to others.

Liaison to LRC: Name _____ Phone/Email: _____

Signatures of Church Council: _____ Date: _____

Action Plan Guidelines

1. Study the action plan: Consult this Guide and the websites/resources listed with each item for more information.

2. Choose one project from each category for the year. Count the projects you are already doing and add more where feasible [e. g. celebrate Earth Sunday]. Be sure to choose from each of the five areas. As you proceed fill in the Action Plan Form. Choose more than one project if it seems feasible.

Choose actions/projects that . . .

- Integrate well with existing initiatives
- Have support in the congregation
- Have committed people to carry them out
- Are affordable for the congregation
- You have energy and inspiration for

3. Delegate the responsibility: Identify which individuals or committee will be responsible for carrying out each project. Contact them to see if they are willing to do it [e. g. The Worship Committee]. Offer access to the resources available to do the project [e. g. two websites].

4. Identify a committee member to follow up: designate a member from the creation-care team to offer support to the committee to whom the project has been delegated and follow up to track the project through to completion. Or use the liaison representatives to the various committees who are on the church council [e. g. a liaison from the Creation-Care team to the worship committee].

5. Make the project ongoing: When it is completed for that year, set things up so that the project will continue into the next year [e. g. Put the celebration of Earth Sunday on the worship calendar as a regular part of each year].

6. Report: Report your successes to the church council and the congregation. Promote your identity as a creation-care congregation [e. g. Church newsletter with pictures of Earth Sunday celebration. Local newspaper editorial].

7. Start again for the next year! Begin process of choosing projects for the following year. Begin with #1 above. [e. g. celebrate The Season of Creation]. Be sure to revisit the overall vision provided by the five areas.

8. Other. If the projects recommended in the action plan do not fit your situation, consider opportunities that use the resources of your congregation or serve the needs of your community.

Evaluate and adjust: Meet regularly (once a month or once every two months). As you work through the year, evaluate your action plan. Where needed, go back and retrace steps to make sure your action plan is being carried out. Affirm where it is working. When the steps suggested here are not working for you, revise the plan and adjust it to your needs and situation.

Remember the overall goal: To incorporate care for creation into the identity and mission of your congregation so that there is an ethos of care for God's Earth in all that you do.

Lutherans Restoring Creation Action Plan Ideas

The goal is to make a difference by transforming attitudes and commitments and by embracing concrete actions that reduce human ecological impact on the earth and contribute to justice for people affected by environmental degradation.

1. Transformation through Worship: “Let all creation praise God” (all resources found if searched on our companion ecumenical site: LetAllCreationPraise.org)

- a. **All Worship:** Render every service as creation-care worship: call to worship, confessions, prayers, and blessing/commission, plus scriptures, hymns, and sermons. Share some thoughts from an excerpt offered as part of the a larger guide created by several theologians: [A Theology of Liturgy in a New Key: Worshiping With Creation](#).
- b. **Season of Creation.** Observe a four-week optional season (typically in Sept-Oct. ~ St. Francis Day) to celebrate creation as part of the church year, with liturgies, sermons, and alternative scripture lessons, etc.
- c. **Special Worship Services.** Observe a special day, such as Earth Sunday in April [creationjustice.org], Rogation Sunday, or a “Greening of the Cross” service in the Easter Season.
- d. **Blessing of the Animals.** Hold a service near the time of St. Francis Day (in October) or any time in the church year.
- e. **Appoint the sanctuary.** With creation-care banners, greenery, art.
- f. **Green your worship practices:** energy-saving lights and heat; altar plants, local wine, green cleaning products, eliminate/recycle/reuse paper, intinction rather than single-use cups.
- g. **Other:** For example, develop your own worship resources and occasions for celebration.

2. Education: “Know your traditions and your world”

- a. **Earthbound:** Adult education for this six-part video series produced by the ELCA to explore the theological foundations of Earth care and to examples of Lutheran institutions and individuals carrying them out. Check out the study guide for free to determine if you want to purchase via online streaming or a DVD set: lutheransrestoringcreation.org/earthbound/
- b. **“Caring for Creation: Vision, Hope & Justice”** Organize a forum or study group to read and discuss the [ELCA Social Statement](#). Copies available from the ELCA with guide. See the 52 excerpts from this social statement for use for use in the church bulletin each week.
- c. **Awakening to God’s Call to Earthkeeping.** A timeless four session, small group study curriculum for adult forums. FREE download available on the [ELCA Stewardship section](#). Or consider using the ELCA Lenten series “Creation Waits with Eager Longing” Free copies are available on our website.
- d. **Youth.** Have youth lead an interactive recycling program outlined in our “Know Trash? No Trash!” guide, host a discussion group around the impacts of our daily decisions on our global neighbors (also take the pledge which hundreds of other ELCA youth made at the 2018 gathering to try new habits), get ideas from other Youth Groups, raise funds by selling re-usable bags or mugs at your church. More info/ideas at: <https://lutheransrestoringcreation.org/youth/>
- e. **Children.** Kid’s books abound with environmental themes (The Lorax, The Giving Tree, etc) but for integration of scripture try: I Love God’s Green Earth: Devotions for Kids Who Want to Take Care of God’s Creation by Michael and Caroline Carroll (Tyndale House Publishers, 2010). Vacation Bible School guides from Lutheran Outdoor Ministries are adaptable for various venues and time-frames – most are free to download!
- f. **Other:** Organize forums with local experts (teachers, researchers, health professionals, natural resource public servants, college students exploring new subjects, Scout leaders), purchase a copy of “The Green Bible” for a focused Bible study, host a community showing of publicly accessible documentaries (via NOVA, the LRC YouTube Channel, PBS Digital Studios, etc.)

3. Building and Grounds: “The church as an alternative community”

- a. **Energy Stewards Initiative.** LRC helps congregations navigate the best path to reduce their carbon footprint and save funds. In some areas working with local affiliates of Interfaith Power and Light can walk you through every process, in other areas local utilities offer everything you may need. All church facilities are encouraged to participate in the FREE Energy Star Portfolio EPA program, which adjusts for weather and rate changes to accurately compare resource usage across the nation and for long time-frames. If funding improvements is a hurdle, connections with Mission Investment Fund or insight from experienced congregations often help. [Explore options at the Energy Savings section of our site.](#)
- b. **Comprehensive Environmental Guide for Churches, Their Buildings and Grounds.** Use a checklist along with the full guide for an overall environmental inventory of your congregation, and take action. Download (too big to print!) - some details may be outdated, but the ties to scripture and inspiration is timeless:
www.webofcreation.org/Environmental%20Guide.pdf
- c. **Choose a specific project:** just tackle one thing at a time and find allies fast (anyone who likes to garden, who is trying to make the church budget go further, youth looking for volunteer hours, Eagle Scouts considering projects, older generations getting together with younger to re-think the cleaning products). Get members engaged and share resources/stories from others to help see through an eco-friendly lens on all aspects of church-life.
- d. **Use of land & water:** Community garden; restore to prairie; preserve natural habitats; plant trees; create a sanctuary or peace garden; nurture animal life. Phase out fertilizers and pesticides use for lawns. Many free resources, stories, samples and readings to share throughout the LRC site, but local experts are best to build on existing relationships. Consider sharing a broader understanding of our relationship with soil by researching the [“Kiss the Ground”](#) program. This educational movement has the potential to involve those interested in agriculture, science, history, gardening and climate change. [Watershed discipleship](#) resources are plentiful and offer a safe entry point for many who may not feel called to other issues in creation care.
- e. **Know your property as an “Earth community.”** Get to know the trees, plants, animals, insects, birds, and other creatures who live with you on this space. Live in such a way that all of you may thrive together. Pray for them. Worship with them. Include some in your church directory as your creation family.

4. Discipleship at home and work: “Love your neighbor”

- a. **Personal Covenant with Creation:** Plan a worship service in which members can identify the Earth-friendly practices they are willing to commit to at home and work. Use a brief ritual that makes these commitments a stewardship offering. [Our online form](#) helps you save paper and participants will be sent a copy of what they pledged. Use the link at our site under Personal Discipleship and those eager to make change can be connected with other members of ELCA churches across the country.
- b. **Conduct a workshop on making your home Earth-friendly.** Use the aforementioned material available in the Comprehensive Environmental Guide for Congregations, Their Buildings and Grounds as a guide to inform members about the areas of greening they can do on a residential scale. For an efficient online tool to connect with various faith encourage folks to complete this [Living the Change](#) pledge.
- c. **Support groups.** Excellent for change of habits and accountability for “eco-recovery.” Find a bounty of resources at www.ecofaithrecovery.org
- d. **Devotional resources:** Recommend creation-care resources to members for personal devotions. Ask people to sign up to follow a discipline with a resource for a season of the church year.
- e. **A retreat in nature.** Take a walk outside the next nice day after worship. Lead a retreat for people to get closer to the natural world. For guidelines: letallcreationpraise.org/retreat-on-awe-and-mystery

5. Public Witness/Policy Advocacy: “Church exists to serve the world”

- a. **Hands-on project.** Learn what environmental projects are happening [in your area](#) and what organizations are sponsoring them. Recruit members of your congregation to partner with them in the effort. Restore a habitat, clean up trash, plant trees, write letters to local officials, meet with representatives.
- b. **Informational forums.** Learn what environmental organizations are in your community and invite a representative of one or more to present a forum on their program. There are many tools to gracefully converse about civic issues without treading on partisan landmines:
 - Go to [ecoAmerica’s Blessed Tomorrow site for a Moving Forward guide](#) and consider [taking their course](#) to train others ineffective climate communication.
 - There are over a hundred fellow Lutherans ready to speak/train: check out the [Map of Creation Care Ministries](#) and reach out to someone from the Speaker's Bureau +/- or a Creation Care Ambassador. (No need to be geographically close if you are doing a virtual event!)
 - Visit our [videos page](#) to consider hosting an event for the congregation or broader community to come together in communication after watching something as a shared experience.
- c. **Legislative forum.** Invite the head of the [Lutheran Public Policy office in your area](#) to preach and present a forum at your congregation. Or invite a local official familiar with local state and regional issues around the environment. If there is a critical issue in your area, plan a forum for information and conversation about it.
- d. **Action alerts:** Invite members to sign up to receive action alerts via e-mail from ELCA e-Advocacy Network:
<http://www.elca.org/en/Our-Work/Publicly-Engaged-Church/Advocacy/Get-Involved>.
The process for contacting legislators is made very simple.
- e. **Partner with others.** Join with other local eco-faith affiliates in your region and make plans to offer your collective support to local organizing efforts. (If no such organization exists, start one!) Offer to mentor another congregation in becoming a creation-care community - [become a Green Shepherd for your synod](#).

Personal Covenant with God's Creation

Every action has consequences on other humans and on the earth. Become aware of the outcome of your actions, reduce your impact on others, and walk lightly on Earth. Consider these practices to be a spiritual discipline. Have others in your household sign as well and decorate and post this record of your goals to catch your attention - keep it sacred!

All categories below will have updated resources/events/tools on the corresponding pages of LutheransRestoringCreation.org

I pledge to work toward the following environmentally safe practices:

1. Education

___ Learn about the environmental crisis and ecological justice.

___ Read about or join a study group fostering voluntary simplicity.

2. Green your living space

Energy Use

___ Alternative energy: solar/ geothermal/ purchase wind from your energy company.

___ Purchase Energy Star appliances (refrigerator, dishwasher, washer/dryer, water heater, dehumidifier) and high efficiency furnace, air conditioner, and windows.

___ Get programmable thermostat. Lower thermostat in winter; raise it in summer. Change settings when away. Use ceiling fans.

___ Clean/ replace filters for all appliances/furnace with filters.

___ Replace all incandescent light bulbs with compact fluorescent light bulbs.

___ When not in use, turn off lights, TV, computer, appliances. Prefer natural light.

___ Turn off TV, computer, microwave, etc. at the strip/ plug.

___ Run full loads in dish washer, washer, and dryer. Use short cycles/ clothes line.

___ Use microwave/ toaster oven/ slow cooker rather than oven/range.

___ Set refrigerator at 36F to 42F, freezer at -5F to +6F, and water heater at 120F.

___ Use cold or warm water when washing clothes; rinse in cold water.

___ Insulate walls/ attic. Repair leaks around windows/doors. Lock windows to seal.

___ Repair hot water leaks. Insulate water heater ("blanket") + hot water pipes (wrap).

Water Use

- ___ Do not let water run while doing tasks.
- ___ Install low-flow shower heads and faucet aerators.
- ___ Repair faucet leaks and toilet runs immediately.
- ___ Take a short shower rather than a bath, and shower less often.
- ___ Wash dishes and laundry on full load.

Food

- ___ Buy fair-trade +/- or organic products.
- ___ Buy local produce and products.
- ___ Buy only what you will consume, and then use all you buy.
- ___ Put on your plate only what you will eat, and then eat all on your plate.
- ___ Know where your food comes from and appreciate all who made it: <http://www.nourishlife.org/>

Paper Use

- ___ Use recycled, post-consumer paper products for kitchen, bathroom, and cleaning.
- ___ Avoid paper towels; use cloth napkins and handkerchiefs.
- ___ Use electronic media rather than paper.
- ___ Use recycled, post-consumer, acid-free note/office paper or tree-free paper.
- ___ Use the paper completely on both sides.

Reduce/ Recycle/ Reuse

- ___ Buy less stuff you have to throw away (tips at www.goingzerowaste.com)
- ___ Find out exactly what your town recycles and whatever is left look up here: www.realsimple.com/home-organizing/organizing/organizing-tips-techniques/recycle-anything
- ___ Use non-toxic products whenever possible: check <https://www.epa.gov/saferchoice>
- ___ Make your own consumables/toiletries: http://eartheasy.com/live_nontoxic_solutions.htm
- ___ Do not put grease or strong chemicals down drains.
- ___ Buy products with no/less packaging.

___ Compost: create nutrient-rich soil and prevent methane exhaust landfills
http://eartheasy.com/grow_compost.html

___ Use canvas bags for shopping or reuse paper/plastic when shopping.

___ Find out if there are community sharing options nearby (Tool Libraries, www.freecycle.org)

3. Transportation

___ Purchase a car with good fuel economy. Maintain engine/tire pressure. Change oil/air filter.

___ Over 55 miles per hour is least efficient: drive more slowly. Easy stops and starts. Do not idle.

___ Where feasible walk, bicycle, carpool or take public transportation.

___ Flying is the “dirtiest” way to travel, but if you have to, offset your carbon use:
www.cooleffect.org/content/travel-offset

___ Consider alternatives: combine trips, web conference meetings, etc.

4. Work

___ Green the work space and work practices: office, shop, factory, classroom, farm

___ Advocate with employers to green your company, agency, or institution.

___ Promote greening among fellow workers and clients/customers/students.

5. Nature

___ Enjoy as kin the plants and pets in your living space.

___ Take ten minutes a day to enjoy/love nature (sit outside, pet an animal, garden).

___ Use devotional materials that enhance your love of nature and your care for it.

6. Public Commitments

___ Advocate for environmentally friendly legislation and policies.
<http://www.elca.org/Our-Work/Publicly-Engaged-Church/Advocacy>

___ Restore a local habitat; protest a local environmental violation.

___ Contribute to social justice organizations and environmental organizations.

___ Invest in socially responsible stocks and bonds that foster eco-justice.

SIGNED _____ DATE _____

Litany for our Personal Covenant with Creation

L: For the marvelous grace of your Creation, we pour out our thanks to You, our God.

C: **We praise you, O Lord**

for plants growing in earth and water,

for life inhabiting lakes and seas,

for life creeping in soils and land,

for creatures living in wetlands and waters,

for life flying above earth and sea,

for animals dwelling in woods and fields.

L: How many and wonderful are your works, our God! In wisdom you have made them all!

C: **But we confess, dear Lord,**

As creatures privileged with care and keeping of Your Creation that we have abused Your Creation gifts through arrogance, ignorance, and greed.

We confess, Lord, that we often are unaware of how deeply we have hurt Your good earth and its marvelous gifts.

We confess that we are often unaware of how our abuse of creation has also been an abuse of ourselves.

For our wrongs, Lord, we ask forgiveness. We offer our repentance. We promise to reverence Your Creation as a gracious gift entrusted to us by You, our God. We promise anew to be stewards and not pillagers of what You have entrusted to us. We offer our covenant with creation to pledge our commitment to care for Your good Earth.

L: Creator God,

You have given us every reason to learn and promote this wisdom of lives lived in harmony with Creation. May You daily be present with us, gracing our service, our loving, our striving, through Christ Jesus, our Lord.

C: **Amen**

Lutherans Restoring Creation (LRC)

Resources for Creation Care Congregations

The goal of the LRC program is to incorporate creation care into the full identity and mission of your congregation and to foster an ethos in which everyone considers creation care to be part of your life together and your witness to their community. Therefore, choose actions and programs that contribute to this goal.

As you work your creation care congregational program, you may want to expand the choices for the action plan to make bolder plans, to draw upon particular assets, and to address local needs and opportunities. Consult the many additional resources on the websites sponsored by LRC and the ELCA.

1. LRC Manual for Congregations. This manual has many ideas for eliciting the full participation of the congregation as well as some principles for pursuing creation-care. There is also an excellent manual for congregations developed by students at Luther College, with even more ideas and resources we can send to you (a big download, but stunning visually).

2. An Expanded Action Plan. The congregational manual includes a much fuller action plan following the same categories as in your action plan: worship, education, building and grounds, personal discipleship, and public witness/policy advocacy. You will find there more choices and links to more resources. Explore the site for additional ideas.

3. Renewing your program and taking advanced steps. The manual includes many ideas for maintaining a vital creation care program and for taking it to the next level. If you find that the actions in the action plan have been exhausted by your efforts or you want more choices, consult the ideas in these sections, which come at the end of the manual.

4. Stories. For ideas and inspiration from others, consult the story and map section on the LRC website to see what programs and projects have been carried out by other Lutheran congregations.

5. Theological foundations. There are reflections for each of the five areas, identifying the biblical, theological, and ethical foundations for choosing programs and taking actions in each area of the action plan. These are helpful for study sessions or adult forums. Check out the “Theology” section on the left sidebar for more resources.

6. Online resources and networks. Continually check the Caring for Creation Ministry Map on our site to see where others are doing this work near you. Along with the constant influx of material on our LRC site, our companion ecumenical site: www.letallcreationpraise.org, is devoted to care for creation worship throughout the year, featuring resources to celebrate an alternative four-week Season of Creation with alternative lessons, liturgies, and ideas. For a feed of ideas and Good Green News [sign up to be on our e-news](#) and [follow us](#) on Facebook page is constantly sharing other great news, sites, and materials.

7. Professional coaching support. As the ELCA has offered coaching support for years as members work on stewardship programs, a Caring for Creation specialty program has been developed and there are certified coaches ready to support your +/- or your synod. If your green team is at a point that they have some goals, but don't know how to put it anything into action, you are likely in need of some coaching sessions to set some mile-markers along the way.
